Research Interests

I am currently a Ph.D candidate in the Department of Computer Science and Engineering at Korea University (Advisor: Heuiseok Lim). I am a co-founder and CTO of KU-NMT Group. I have published more than 50 papers in the field of Natural Language Processing, Computer Science, and applied for 4 patents.

- Natural Language Processing
- Artificial Intelligence
- Commonsense Reasoning
- Natural Language Generation
- Language Resource and Evaluation
- Language Modeling
- Decoding Strategy
- Neural Machine Translation
- Speech Recognition Post-Processor
- Data Management and Engineering
- Semantic Search and Information Retrieval

Education

(Project) Return on Advertising Spend (ROAS) Prediction Research

RESEARCHER AT KOREA UNIV

Seoul, South Korea

December. 2021. - March. 2022.

- Return on Advertising Spend (ROAS) refers to the ratio of revenue generated by advertising projects to its expense.
- We present a method for predicting ROAS that does not require controlled experiments in data acquisition and validates its effectiveness through comparative experiments. Specifically, we propose a task deposition method that divides the end-to-end prediction task into the two-stage process; occurrence prediction and occurred ROAS regression.

(Project) Hybrid Retriever System for Industrial Frequently Asked Questions Research

PROJECT MANAGER AT KOREA UNIV

Seoul, South Korea

December. 2021. - March. 2022.

- We propose a method of returning responses to customer inquiries using only data that can be easily obtained from companies based on the deep learning information retrieval module. In this work, we hybridize dense embedding and sparse embedding to make it robust to professional terms and suggest new functions to scale the results returned by the two modules and adjust the weight ratio.
